Core Solutions  
of Microsoft  
Skype for  
Business  
2015

## O V E R V I E W

This course provides students with the knowledge and skills that are required to plan, deploy, configure, and administer a Skype for Business 2015 solution. Students will learn how to deploy a multi-site and highly available Skype for Business infrastructure that supports instant messaging, conferencing, Persistent Chat, archiving, and monitoring. Students will also learn how to manage and maintain the infrastructure and how to troubleshoot issues that might arise. This course focuses primarily on an on-premises Skype for Business deployment, but it does include information on how to integrate an on-premises deployment with Skype for Business Online and how to migrate from previous versions of Lync Server. This course helps students prepare for Exam 70-334.

## Duration: 40 Hrs

### Prerequisites:

- A minimum of two years of experience administering Windows Server 2012 or Windows Server 2008 R2.
- A minimum of two years of experience working with AD DS.
- A minimum of two years of experience working with name resolution, including Domain Name System (DNS).
- Experience working with certificates, including public key infrastructure (PKI) certificates.
- Experience working with the Windows PowerShell command-line interface.
- An understanding of data networks and telecommunications standards and components.

### Course Exam:

Code	Name	Duration
70-334	Core Solutions of Skype for Business 2015	40 Hrs

# Course Outline

## Core Solutions of Skype for Business 2015

- Module 1: Design and Architecture of Skype for Business Server 2015
- Module 2: Installing and Implementing Skype for Business Server 2015
- Module 3: Administering Skype for Business Server 2015
- Module 4: Configuring Users and Clients in Skype for Business 2015
- Module 5: Configuring and Implementing Conferencing in Skype for Business 2015
- Module 6: Implementing Additional Conferencing Options in Skype for Business Server 2015
- Module 7: Designing and Implementing Monitoring and Archiving in Skype for Business 2015
- Module 8: Deploying Skype for Business 2015 External Access
- Module 9: Implementing Persistent Chat in Skype for Business 2015
- Module 10: Implementing High Availability in Skype for Business 2015
- Module 11: Implementing Disaster Recovery in Skype for Business 2015
- Module 12: Integrating with Skype for Business Online
- Module 13: Planning and Implementing an Upgrade to Skype for Business Server 2015

# Course Objectives

- Describe the Skype for Business 2015 architecture and design a Skype for Business 2015 topology.
- Install and implement Skype for Business Server 2015.
- Administer Skype for Business Server 2015 by using various tools.
- Configure users and clients in Skype for Business 2015.
- Configure and implement conferencing in Skype for Business 2015.
- Implement additional conferencing options, such as dial-in conferencing, Microsoft Skype Room System (SRS), and Skype Meeting Broadcast.
- Design and implement monitoring and archiving in Skype for Business 2015.
- Deploy Skype for Business 2015 external access.
- Implement Persistent Chat in Skype for Business 2015.
- Implement high availability in Skype for Business 2015.
- Implement disaster recovery in Skype for Business 2015.
- Design and deploy a hybrid Skype for Business environment.

## Targeted Audience

### This Course Is Designed For:

The primary audience for this course is information technology (IT) professionals who are responsible for the Skype for Business 2015 deployment in their organizations. Experience with previous versions of Lync Server is beneficial but not required to take this course. Students should be proficient with Active Directory Domain Services (AD DS), data networks, and telecommunications standards and components that support the configuration of Skype for Business. Students should also be familiar with Microsoft Exchange Server and Microsoft Office 365.
